DRAWING CHANGES

2. New corrected drawings in compliance with 37 CFR 1.121(d) is required in this application because the current drawings are handwritten. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The Instant application is allowable over the prior art of record. The following reviews the closest Non Patent and Patent literature.

Non Patent Literature

"Dynamic Trace Selection Using Performance Monitoring Hardware Sampling" by Chen et al 2003 IEEE. Teaches Optimizing programs at runtime and utilizing architecture features enhance the runtime optimization. Although, the article performs optimization in runtime the article fails to teach version management and memory control other than cache rates (miss etc).

Patent Literature

Butt et al USPN #5,799,143 Butt implements context sets for the purpose of instrumentation. Butt is primarily a teaching of runtime optimization and not how to update version of a program. Butt is silent as to allocation and un-allocation of memory address space. Saboff et al, March 13, 2001 creates optimized libraries and replaces the library.

Neither reference teaches the claimed invention singularly or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
